

Button Cups

Overview

Campbell Company manufactures button cups for round and rectangle push buttons. These button cups are machined from solid stock and provide service entry from back and bottom/ top. Each button cup is supplied with a removable chase nipple, drilled plug and SS mounting hardware.

Materials

All Campbell Company button cups are machined from solid 6061 T6 rod or bar stock.

Geometry

- 3" SR provides mounting for a 3 "push button with 4 or 2 (specify 9-3, 10-2) bolt pattern.
- 3" SR LP provides a low profile mount for Campbell 4 EVR push button
- 3" SR S provides a deeper button cup for Campbell Series push button
- Rec BC provides mounting for 2.8 X 4.5 rectangular push button 2 or 4 bolt pattern
