

Signs

R10-3e

R10-3w

PedSafety manufactures MUTCD signs for pedestrian access and a variety of other applications that are screen printed on .060" hard enameled coated aluminum. Signs that contain Right or Left arrows are printed double sided with one left and one right arrow per side based on the needs in the field. 3M™ reflective films are available in several different grades to meet the various needs of agencies. If signs without reflective films can be powder coated various colors. Grade 2 Braille can be added to the lower quadrant of most signs. Maximum number of lines is dependent on size of sign.

Reflective Films

- Engineering Grade
- Diamond Grade
- MN Grade
