

## 90-Degree Extension Adapter for Guardian® and WiAAPS®

The **90-Degree Extension Adapter** enhances the functionality of Guardian® or WiAAPS® by seamlessly rotating them 90 degrees. This thoughtful design not only adds convenience for pedestrians but can also bring you intersection up to ADA compliance. The installation involves mounting an extension bracket to a pole, attaching the 90-degree adapter to the extension bracket, and then securing a Guardian® or WiAAPS® to the adapter. This results in a parallel alignment with the extension bracket arms, optimizing both form and function.

**Part Number:**

503-0192

**Powder Coat:**

Yellow or Texture Black

**Materials:**

6061-T6 Aluminum

**Warranty:**

5 Years
